

# Important TTC service changes at Broadview Station

Starting June 18 to November 2023

Broadview Avenue between Danforth Avenue and Gerrard Street East will be under construction from mid-June to November 2023 and **closed to bus and streetcar service effective June 18**. TTC is upgrading streetcar tracks and overhead power along Broadview Avenue and at Broadview Station.

## This work will impact service in the following ways:

- **Subway service remains open at Broadview Station.**
  - **No 504 304 King or 505 Dundas bus or streetcar service going to Broadview Station.**
  - **No 504 304 King and 505 Dundas service** between Parliament Street and Broadview Station.
  - The **304 King** bus will be extended to Pape Station, following the same route as the **72A Pape** bus.
  - The **72A Pape** bus will be extended to King and Parliament streets from Pape Station. Service along this route will be increased for frequent travel between King and Parliament streets and Pape Station. Customers must transfer to a westbound **504 King** streetcar to travel downtown from King at Parliament Street.
  - Customers can also take **Line 2** to Bloor-Yonge Station and travel south on **Line 1** to their destination.
  - **100 Flemingdon Park** will be diverted to Pape Station and continue south as the **72A Pape** to King and Parliament streets.
- The **8 Broadview**, **62 Mortimer** and **87 Cosburn** will continue to service the station.

For detailed service information, call 416-393-4636 or visit [ttc.ca](http://ttc.ca)

## Alternate routes:

- Take the **501B Queen** bus at Broadview Avenue and Gerrard Street East westbound towards downtown.
- If travelling to Gerrard Street East or Hennick Bridgepoint Hospital, go to Pape Station. Take a **72A Pape** bus southbound from Pape Station to Gerrard Street East and Carlaw Avenue. **506C Carlton** replacement buses are available along Gerrard Street East westbound to Castle Frank and eastbound to Victoria Park Station.

Please continue supporting **Broadview-Danforth businesses** during construction.
